REZA RAHIMI

AUTOMOTIVE MANUFACTURING IT/OT & DIGITAL PRODUCTION ENGINEER

Production Systems • MES • Traceability • Industrial Equipment Integration

Spain | Authorized to work in Spain without employer sponsorship | +34 603 083 322 | o.rahimi@ymail.com | linkedin.com/in/omid-reza-rahimi

PROFESSIONAL SUMMARY

Industrial IT/OT and digital manufacturing engineer with 20+ years of experience supporting and developing technology across large-scale automotive manufacturing at Iran Khodro Industrial Group. Experience spans engine manufacturing and assembly, machining, body, paint and press shops, laboratories and warehouse operations. Background includes production-critical applications, Central Control Rooms, manufacturing execution systems, industrial communications, Siemens WinCC, PLC-related environments, OPC/PROFIBUS, SQL Server, industrial PCs, RFID traceability and specialized production/test equipment. Combines operational troubleshooting and system lifecycle support with MES feasibility, manufacturing data collection and technology modernization planning.

CORE COMPETENCIES

Automotive production: Engine manufacturing and assembly; machining; body, paint and press shops; laboratories; warehouse operations

Production IT/OT: Production-critical systems; troubleshooting and recovery; lifecycle support; modernization; production continuity; Central Control Rooms

MES & manufacturing apps: Melody manufacturing execution platform; MES feasibility and strategy; requirements; technical documentation; production monitoring

Automation & connectivity: Siemens WinCC; Siemens PLC-related environments; SCADA/HMI-related systems; OPC; PROFIBUS; Ethernet-connected systems

Traceability & data: Siemens RFID Moby I; production traceability; shop-floor data collection; SQL Server; Paradox manufacturing databases

Equipment systems: Power Test; ZEISS and DEA CMM platforms; laser inspection; leak testing, tightening and filling systems; CNC and automotive test systems

Technology planning: Industrial asset inventory; risk/lifecycle assessment; vendor coordination; technology evaluation; modernization roadmaps; preliminary budget planning

PROFESSIONAL EXPERIENCE

Operational Technology Development Lead

Iran Khodro Industrial Group | Tehran, Iran | 2025–Present

- Contribute to enterprise OT development strategy, technical standards and modernization planning across manufacturing environments.
- Coordinate technical requirements and planning with manufacturing, engineering and IT/OT stakeholders.
- Participate in an OT network modernization initiative informed by IEC 62443 principles, including secure architecture and segmentation planning.

Senior Industrial IT & OT Engineer

Iran Khodro Industrial Group | Tehran, Iran | 2010–2025

- Led Industrial IT/OT support across three major manufacturing divisions, serving as a technical focal point for troubleshooting, recovery, modernization and lifecycle management of production-critical systems.
- Supported production continuity across engine assembly, machining, body, paint and press shops, laboratories and warehouse operations.
- Developed technical inventories, risk assessments and modernization roadmaps; contributed to lifecycle planning, investment estimates and vendor coordination.
- Contributed technical advice to MES, production traceability and OT modernization initiatives; managed hardware lifecycle for industrial and business-critical computing platforms.

Industrial IT & Manufacturing Systems Engineer

Iran Khodro Industrial Group | Tehran, Iran | 2005–2010

- Administered the Melody manufacturing execution platform supporting production monitoring, shop-floor operations and Central Control Room systems.
- Maintained Siemens RFID (Moby I) infrastructure and production traceability systems for engine manufacturing.
- Supported Power Test, ZEISS and DEA CMM platforms, laser inspection systems and industrial communications using OPC/PROFIBUS.
- Delivered Industrial IT services for Engine Manufacturing Management, supporting availability of production systems.

SELECTED PROJECTS

MES feasibility & strategy: Led enterprise feasibility assessment; developed technical documentation, functional requirements and architecture recommendations; assessed processes, integration needs and deployment strategies.

Engine production traceability: Core technical contributor to Siemens RFID-based traceability; supported integration among shop-floor systems, Central Control Room applications and manufacturing databases.

Legacy manufacturing platform modernization: Contributed to modernization of the Melody production management platform, including system analysis, technical validation, deployment planning and production transition.

Industrial technology roadmap: Led assessment of Industrial IT/OT assets, developed inventory and risk/lifecycle evaluation framework, and defined modernization priorities and preliminary budget planning.

REZA RAHIMI

EDUCATION

- M.Sc. in IT Management (Advanced Information Systems), Payam Noor University, Tehran, Iran — 2020
- B.Sc. in Computer Engineering (Hardware), Azad University, Tehran, Iran — 2002

ADDITIONAL PROFESSIONAL EXPERIENCE

Owner & Managing Director (part-time) — Industrial Automation Magazine | Tehran, Iran | 2014–2020 — Founded and managed a bilingual technical publication; produced 20+ issues on industrial automation, OT, industrial networking and manufacturing technologies.

Adjunct Lecturer — University of Applied Science & Technology | Tehran, Iran | 2010–2014 — Taught undergraduate Computer Engineering and IT courses and supervised student projects in industrial computing and networking.

Hardware & Network Manager — Vasal Control Co. | Tehran, Iran | 2005 (8 months) — Supported hardware and network infrastructure and participated in industrial automation/control projects.

Electronics & Embedded Systems Engineer — Military Service | Tehran, Iran | 2003–2005 — Developed an Intel 8051-based embedded board and integrated an RF analyzer with a PC to digitize, display and store measurement data.

Hardware Support Technician (part-time) — Iran Air (HOMA Airlines) | Tehran, Iran | 1998–2003 — Assembled, upgraded, maintained and repaired PCs and peripherals.

PROFESSIONAL CONTRIBUTIONS & PUBLICATIONS

Core technical member of the enterprise industrial automation team and technical member of the enterprise RFID & traceability steering committee. Best Paper Award at an International RFID Conference; author of a conference paper on IT management in manufacturing; translator of an ISA publication on MES; author of technical publications on industrial automation, RFID and manufacturing technologies.
